This is probably going to be the best "How to start with nothing video you've ever seen in your life."

What is 50 dollars a day?

\$50 Each and every day doesn't seem like that much money to some people. But to a lot of people, it's like fifteen hundred dollars a month. That's a mortgage payment.

And this adds up to \$18,250 every year.

Imagine being able to make eighteen thousand dollars a year from a little bit of work automatically on auto pilot.

Because what we're gonna talk about is passive income.

Making one of these each and every day is pretty cool. But most of you can make more than that with a regular job. So it's not like huge, but **the secret here is passive income.**

Because if I can make 50 dollars a day everyday without doing any more work, then I could go build more things that make more 50 dollars a day. Or I could continue at my job and just have an extra fifteen hundred dollars a month.

Now, let's disclaimer this the results are not typical, implied or guarantee. I don't know if you'll make 50 bucks a day. Don't know if you'll make one dollar a day. Don't know if you'll make a penny a day. And I don't know if you'll make one hundred thousand dollars a day. All of those results have been got by people before. I have lots of friends that do six figures a day. I do five figures a day on many days.

And so we look at this and we got to focus.

But I got to tell you, there's work involved. There's risk involved. Obviously, you're going to risk your time. But in this video, you don't have to risk your money.

So you've got to keep that in mind. The average affiliate marketer never does anything that I teach. That's right, friends.

I have six hundred and thirty videos as of right now on my YouTube channel. And the majority of people that watch them just get entertained by them and don't actually do the work, but the people who do the work get the results.

Now let's dive right in.

The first thing you're gonna do if you want to make your 50 bucks a day is find a specific problem people have.

This is problem solution based stuff.

This is the easiest way to make money because you have people with a problem. You're going to provide a solution and you're going to point to your affiliate offer.

So if I have a problem and I'm like, hey, my girlfriend or my wife doesn't like me very much today or I'm in the doghouse, then I could say, hey, the best way to get out of the doghouse is to get her flowers. And then I could link to my affiliate program for flowers and get paid when people buy flowers.

Hint in just Nine days. It's got to be Valentine's Day and a shit ton of people are going to be buying flowers for their spouses and their people.

And there's lots of affiliates that are gonna make lots of money.

Will it be you?

I don't know.

We're gonna figure it out.

So the problem solution type thing.

Here's an example. Is an example niche that you can use right now? The example is Excel budget. People every day are looking for templates to do budgeting on Excel.

What this means is they're looking for some kind of budget.

They're looking some kind of solution to their problem. And they want to budget things and they want an excel file and get all organized.

They're like those those people who have excels for everything, like organized people. I don't know what organization is that skip to my brain long ago, but these people are looking for it.

Now, what do people that are looking for budgets want?

Maybe you could offer credit cards. Maybe you could offer debt relief. Credit consolidation. Credit scores.

Lots of things and all of these pay lots of money.

People are looking this stuff up and it leads to an affiliate offer. Boom, boom, boom. There you go.

That's the three pillars to affiliate marketing success.

A problem, a solution and a product.

Simple. So next, what you do is you say, well, what can I offer these people?

This is what I call the flip.

The flip is taking someone looking for something and then finding something to offer them. Very simple.

These people just want a little Excel budget thing.

And I'm going to I'm going to go ahead and give them that Excel budget thing because that's what they wanted.

And then I got to say, by the way, if you want a budget, good. Here's a way to go.

Robert's got a good suggestion. He says, hey, high interest checking and savings account. Yeah. High high yield savings accounts work good.

Maybe investment programs.

So that's the flip. You're gonna take them from the budget calculator, the Excel thing, and you're gonna flip them into the offer.

they don't even have to buy it.

They have to do anything. They download it and you get two dollars and fifty cents, which is cool. That's like. A 20th of the way to our 50 dollars a day, so if you only get like one an hour and take four hours off, you're gonna make your 50 bucks a day.

And all you've got to do is make a little resource showing them how to edit PDF files, you can make a video, all kinds of stuff. We're gonna get into that later.

We're gonna show you 13 free programs you can use to do this without any money.

So if you're totally broke and you're like, Marcus, I don't like paying for anything, that's ok.

Most people have no problem spending a thousand dollars on a new cell phone. But you know, when it comes to making money online, I don't want to pay anything.

So if that's you, that's all cool. That's all fine and good. You don't have to spend anything. You could use your thousand dollar phone to make a video or do your editing or whatever it is.

So edit a PDF of all these people are looking for how to edit a PDF.

Here's another one. Remove.

People want to remove things.

Remove a background from an image.

How to remove skin tags.

Remove a tick.

Background wallpaper.

Nail polish. Screws.

Skin tags. Acne.

All kinds of things. People want to remove all this stuff. They even want to remove popcorn ceiling, which I wanted to remove a couple of years ago, paid like three thousand dollars for it. So, hey, there's some money in these markets.

So you gotta look at this.

You get a focus and you got to be like, OK,

what's the problem?

What's the solution?

What's the offer?

I'm going to point to problem - solution then - point to offer.

Very simple.

So what you're gonna do is you're gonna go out there and you're gonna find things to offer these people. It's extremely simple. You can go to clicbank. You can go to Commission Junction. You can go to link share. You can go to offer vault. You can find a separate standalone affiliate product. There's lots of people that are willing to pay you for stuff. So let's take a look here.

Next, we want to choose our traffic platform again. This is free, so we don't have our own website yet.

We don't have anything.

So we're gonna go and we're gonna do this free.

How to choose your traffic platform.

Here's nine free platforms you can use to get traffic really, really fast.

1. Wordpress.com

You can go over to WordPress.com You can open a free WordPress blog. Got to pay nothing. You just go there, you sign up. Yeah. Got a blog. Very simple.

2. Medium.com

You can go to medium and you can start a site on medium.

These are already ready to go. They get picked up in the search engines really quick and you can start utilizing them.

3. Guest Blogging

You could do guest blogging, right. You go to other people's blogs and write some content. Take you about an hour to write content. Like really, how long would it take to make some content about how to edit a PDF or how to remove a background from an image or excel budget? Templates wouldn't take that long. Like literally, I could probably do that in 90 minutes if I'm totally slow, like taking a nap for 60 minutes and then working on it for 30 minutes. It's not that hard to do.

Now the cool thing about these is once you make your content, you are going to have it live on the internet forever.

Right now I'm making this live video. This live video is going to take about forty five minutes to create.

This doesn't cost me anything to make.

And unless you count the cameras. But most people have a camera they can use. Most people have a phone. You can do it free. You can make it. It's going to live on the Internet forever.

It's going to get traffic. People are going to buy stuff. People are going to come to my site and boom, there we go.

4. Ezine Articles

Next, we go to EzineArticles. You can put an article up there.

Now, here's the problem. Most people go there and they're like, well, you know, Marcus is I just I'm not going to listen to you because, you know, I'm doing my own thing. And, you know, I know you've been doing this 20 years, but I've been doing it five minutes. And I think I know what to do. And they're like, I'm going to go for the word budget.

And they write an article about budget and they get no traffic.

Don't do it that way. Go for the words that are easy, that are low competition.

Don't do what the other people say and find your passion and blog about your passion.

No one cares about your passion until you get in front of them.

No one gives a rip and you can't get in front of them by just being passionate.

It's not going to work. I'm passionate about lots of things that don't make me money. Now there's some passions I make a lot of money on.

But you've got to focus.

5. youtube

We got YouTube, it costs nothing to upload video to YouTube. Again, if you focus on the right keywords and you could go you could use Ubersuggest, which is a free keyword tool, you can get reports just like the reports that I'm doing here. Very simple. Very easy.

You can create a YouTube video using clip art, using screen capture software. We're going to talk to you about how to find those free.

You can do text to speech or you can do it audio with the background. Not that hard to do. You can outsource it. You can create these in.

Literally minutes and put it out there. The key is creating good content. Create good content. Very important.

6. Facebook Groups

I have a Facebook group that's very profitable, I have friends that do six, seven figures with Facebook groups. And again, guess what they cost to open?

Nothing.

You click a button. You start a group. You get some people to the group. You start interacting with them. You start giving them solutions to their problems, like, hey, guys, I know this Facebook groups about weight loss.

I created this little Excel thing to help you track your weight loss. Very simple, right?

7. Blogger.com

You can also go to blogger and open a free blog.

8. Forums

You can go to forums and make a free forum account and just start talking to people. Because forums are all about problems people have, they're like, hey, man, I can't put this thing on WordPress, you're like, oh, hey, well, you know, here's how you can do it. And the best way to do it is with this plugin. Go buy the plugin or whatever. Very simple.

9. Quora

Next, you can use Quora. Now you got to use these the right way by providing value. If you just go to quora and you spam your link, you're gonna get shut down. If you go to forums and you spam your link and you don't give good stuff. You're going to have trouble.

You got to play within the rules and you've got to follow what they say to do. You can't just go on YouTube and put up the same video a bazillion times or put up a bunch of junk videos.

It's not going to work. You got to make quality content, people want to watch. Very, very simple.

Right now, as you are watching this, there are millions of people on YouTube, millions of people on Quora, millions of people on forums, millions of people on YouTube groups, tons of people reading ezine articles, millions of people reading guest blog posts. Millions of people looking at WordPress stuff. Millions of people looking at medium.

They're there right now right this second.

So here we go. Recap. OK. First, choose our problem. Solution keyword. Find a specific problem. People have no to choose your platform. Where you gonna go? Very simple. Choose one, two. All of them. Doesn't matter if you choose them all. Obviously, you're going to get more traffic if choose one. You've got to look at it. Okay. Very, very, very important. Okay. So nine platforms, you're going to choose your platform. Then you're going to create a helpful piece of content for your specific problem keyword.

Create a helpful piece of content for your specific keyword.

What are they looking for out of why?

Edit A PDF if you make a content video blog post PDF or Excel file, whatever, you make the content about the keyword.

You make good content. If other people have budgets templates, you're gonna make a better budget template.

If other people have a report that kind of is ok but not great. You're gonna make a great one.

Spend the time, do the work.

It's going to live on the internet forever. Hopefully make you money each and every day.

So what we're gonna do is we're gonna create a helpful piece of content for your problem Keyword This is known as a traffic magnet.

Why is it known as a traffic magnet?

Because you could get traffic by having good content.

Now all content is not created equal.

You've got to make something focused on the specific person you're after and you gotta make something somewhat good.

You could learn about any niche.

You can figure anything out.

Just watch a bunch of videos, read a bunch of stuff.

Boom. You're going to learn.

You could put it together, make it really easy.

OK, here are 7 easy traffic magnets that you can use.

1. Blog Posts And Articles (use open source office software)

You can make a blog post. You can make an article. There you go. If you need a free program to make these, you can make it in Microsoft Word. You can make it in notepad. You can even go get an open source software like an office type software or something. There's tons of them out there that are free. And you could create these blog posts and articles. Boom like that.

2. PDF Files, excel files, templates, ect (open source office)

You can make PDF files. Oh, Marcus, I don't know how to make a PDF.

Well, you go in Microsoft Word and you hit save as PDF, then you're done and you have a PDF. All right.

And I got to tell you, people love PDF Files.

I don't know what it is, but people online, like if I say here's a blog post or here's a PDF, they love the PDF way more than the blog post, even though it's the same thing. They just love it. I

don't know why they got a PDF thing going on and we can use that to our advantage.

Next, we could do Excel videos or Excel files, right? We can make Excel files.

Go into Microsoft Excel. We can make a little budget.

We can make a calculator.

I actually made one years ago that did pretty well and it was a home value amount calculator.

So like if you're looking to sell your home, I would put. What's the high amount? What's a low amount? And it would calculate what you're gonna get after realtor fees and everything like that.

Took me about an hour to make I was actually in the car when I made it on the way to Lake Tahoe and we lived in California and I made it in an hour while bumping around in a car.

So, I mean, if I could do that, you could do it, too, which is pretty cool. Another thing you can do is templates every single day. I get traffic from a very simple blog theme that I created. I put it on free.

Simple. What did I put it on? Simpleblogtheme.com It's a little WordPress theme that I created. Took me about an hour to make people download it every single day. It builds my list. It works like crazy, which is really, really, really cool.

So you can do this using open source stuff again.

3. Video Content Tutorials

You could do video content tutorials. You can make a little video. So like, let's say you have an Excel file, you can make a video talking about the Excel file and how to use it.

And then boom, you go for the keywords, you go for the traffic doesn't cost anything to make you put it up there and you lead them back to your free platform that you put up here.

Very simple.

You go to my site, that's where you have your affiliate links and stuff like that.

Now, if you want to make free videos, you can go to freecam. You can go to shareX. You can go to camstudio. Easyvid or screenrec.

You can use these free. It doesn't cost anything.

And if you're really lazy, you could just put the description link as your affiliate link. Just make sure you have a disclaimer that says, hey, yes, I am an affiliate and I get paid when you buy stuff, which is why I make you really, really, really cool videos.

4. Helpful Lists (notepad)

You can make helpful lists. A lot of people do not realize that lists are value.

If I can make a list like this here, here's a list of the five free video content tools. Boom. There you go. There they are.

That's a list. Very simple. OK. Helpful list are very, very good. Very easy to make. And people love them and they'll read them. And you just put, you know, like number eight. Here's my page resource. That's really good. That will do X, Y and Z that the free ones won't do. OK.

5. Step By Step Instructions (word editor)

Step by step instructions.

Step 1. Step 2. Here's how to remove popcorn ceiling. Step. 1 I don't like spray your ceiling with something, step to scrape it, step three, clean up the mess or whatever it is. Right. Obviously, it's a lot more competitive.

But you guys get the idea and then you could be like, hey, you know what? If you don't want to mess your house up and screw everything up, click here to get a quote on popcorn ceiling removal. And I think you will really, really like it. Right? Very simple. Or maybe there's like a guide or maybe there's a

course on how to do this. Very simple. If it sells for 50 bucks and you get twenty five or 40 or whatever it is.

Boom. There you go. Step by step instructions. You could do this in a word, Ed.. It's not going to cost you anything. Right. All you got to do is spend a little bit of time, do the research, do this stuff. Boom. There you go. Very simple.

6. Facebook Groups (word editor, snipping, video tools)

Let's say you have a Facebook group about how to remodel your house. Very simple. I have friends. They have a hundred thousand people in their Facebook group. I have my own Facebook groups or I have thousands of people in my Facebook groups, and they love the content we put out.

All you can do is be like, hey, you know what? The new remodel thing of the day is. Redo your kitchen, right. Check this out. Hey, these kitchens are really cool. You want your kitchen to look like this. Call this number. Click this link and get a estimate. And I get paid when they get an estimate.

They get on the phone for 30 seconds or 90 seconds and I get like 100 bucks or something. Like that - insane. Right. Pretty cool.

Not that hard to do. You get one of those every two days. You're at 50 bucks a day. Pretty cool. So Facebook groups are really good. Now, the tools you would need for Facebook groups is obviously a word, Editor.

Now, you could do this on Facebook, but word editors a little bit easy. And I like to save the stuff that I make. So I keep it and I can repurpose it other places.

And then another thing is good is the Windows snipping tool. I think Mac has a version of that. But, you know, we look at it. We're like, OK, there we go. Pretty cool, right? The snipping tool is great. Now, another thing you could do is images, right? You could do like Pinterest. You could do all these other image sites and you could go through.

7. images (snagit free trial, windows snipping, paint, word, jing, gopic, screenpresso)

And create helpful images.

Maybe like a step by step image thing or maybe an info graphic or maybe a tutorial within an info or an image or whatever, it is very simple to do.

You go there and you're like, OK, I can make these with a snagit, get free trial, right? I get like 45 days free would snag it at the end. It's like twelve bucks or twenty bucks at 30. I don't know. Something like that might be 50 bucks, but you can use a free trial of that.

You can use windows snipping tool plus paint. Right. Microsoft paint work. You can make images in that. You could do Microsoft Word and the snipping tool. Right. Create it and Microsoft Word and just do a little snip around it and boom.

You got an image you can use jing you can use go pick and you can use screen presto boom free programs.

We could go out there. We could do this stuff starting right now, everyone and anyone can do this. If they focus, it's not hard to do.

We go out there. We research the niche.

Look at the other Excel templates they have and be like, what are they going to go out there? I mean, look at the other list, the other articles, the other PDFs. I got to see what's out there. And I'm going to one up them. I'm going to do better.

And then I got to position it in front of the people that are looking for it.

And I can put my affiliate links on it. You can embed your affiliate links on an Excel file. It's not that hard to do.

You can embed your affiliate links in a PDF. If I do it all the time and the PDFs live on people's computers forever. They read them. They look at them. They go out there and they click the links and make me money, which is pretty darn cool.

You can even do this in like the Bible verse niche if you want to make lists of Bible verses, if you're into that kind of thing.

You could do this with inspirational quotes, find a bunch of quotes, get some inspirational stuff, and then you can list of the top 10 books you like or whatever.

Lots of ways to make money, not that hard to do. Now the key is to embed your bonus step or recommended tip within your resource.

So you're going to make your resource, your traffic magnet. And within that, you're going to be like step one, step two, step three. Step four is my bonus step. It's going to cost you a little bit, but you can get this or hey, here's my list of Bible verses, by the way. I use these. I use this Bible software to get my Bible verses every day.

Click here to download it. I get two dollars and fifty cents every time they download it. If I get 20 of those a day, I'm at 50 bucks.

And I gotta tell you, on some of my sites, some of my blogs, I've had as many as a thousand to 4000 downloads a day. That shit adds up really, really quick and I didn't have enough to sell anything like it wasn't even that hard. You just go and you do it and boom, there you go.

So you embed your bonus step or your recommended tip within your resource.

Again, once you create the resource, one time it lives everywhere.

You can go promote it anywhere and everywhere you want.

People on Quora would love to read your PDF.

If it helps them, if it doesn't help them, they're going to want to read it. But you got to help them.

Now, I'm going to show you how this works in real time. All right.

What am I doing right now?

Does anyone know what I'm doing? Well, I started a live video and I'm like, this video is going to be about how to make 50 dollars a day, starting with nothing.

\$50 A Day Starting With Nothing!

affiliatemarketingmc

Scheduled for 2/5/20, 10:00 AM

SET REMINDER

And there's a bunch of people watching my live video right now, hopefully giving us a like because hopefully I like this stuff.

So they're watching my video right now.

Video doesn't cost me anything to make.

Obviously, I spent a lot of money in studio equipment, but you don't have to. Right. I did it because I run this as a serious business.

And you could do that once you start making a bunch of money.

So I started this. I got my video, I got my software, actually, the software that I'm streaming with, what's free?

It's called OBSStudio and it's free. I stream with it makes all these cool things very simple. OK. So I set this up. I got in front of the people who had a problem.

They are watching the content on a free platform.

You guys are watching this on a free platform.

I didn't need a Web site. I didn't need anything. I'm just here talking on the free platform.

Very simple. Very easy.

All right. Technically, this cost me nothing to make. Now, what's the deal? You came here with a problem. You're like Marcus.

I like 50 bucks. I like it. This is good 50 bucks.

I want the 50 bucks a day. That's the problem. You want to make money online.

So what do I do?

I teach you something simple that works.

I'm like, hey, guys, here, you can do this. Anyone can do this. Here's some free programs. Here's some stuff. Go do it. Then what I do is I'm like, well, let's talk about the pros and cons of what I just talked about.

All right. So the pros and cons. Right. The pros of what I just taught you is it costs nothing to start. Nothing. Zero. You could start with zero dollars. Put your wallet in your pocket, wherever your pocket is down there. Put your wallet in your pocket because it's nothing bad. There you go. The pros. Doesn't cost anything. It's easy to set up. And it's great if you have no money.

Now, there are some downsides. But hey, you know what? If you're totally broken, you need to make money. Go do it. I mean, if you don't have money, you've got to do this way. There's no way

around it. Now, there are cons because a lot of people out there do have some money and, you know, maybe a little bit or whatever.

The cons to doing this is you don't own it, right. If you're using someone else's platform, you don't own the content. If you're on Facebook and they decide they don't want your content anymore. Boom. There it goes.

Goodbye. My automatic money is now gone, too.

You don't get a custom domain name. That's the biggest downside.

[Start Your Own Custom Hub Site With Domain Here](#)

I need a custom domain name so that if I do a video or a tool, I could say go to affiliatemarketingdude.com to get my free toolbar.

That's a lot easier than being like what I want to do. I want to go to Markus dot blogspot dot com slash 54, slash 26 a B dot p. hp.

It's a lot easier to be like go to affiliatemarketingdude.com.

Number three doesn't allow you branding.

Number four, it's limited on the plugins, right? Not a lot of plugins you can use on free sites. No.

We're on five. They put other ads on your site. Like if there's ads on my site and I don't get paid for those ads. No bueno. I do not like that. Not good. Not fun.

I want to make money off my content every way possible. No, whatever. We're on six, seven, something like that. It has annoying redirect links, as we talked about earlier. Not having your own affiliate marketing dude versus like, you know, blog dot HubSpot dot com slash or whatever. OK.

And then lastly, if you get kicked off platform, you lose everything, all your search engine rankings, everything you worked up for. It's all gone.

Then what I do. Is I say this is the way you could do it. And I lead you to something more helpful.

So here's the deal. How would you like something where you fully own it like it's yours? You own it?

How would you like to get a free custom domain name? That's pretty cool, right? Your own dot.com name and you don't have to pay for it.

How would you like custom branding? The ability to use all the WordPress plugins?

How to control your own ad space. Like if there's ads on your site, you're getting paid. How would you like that?

Easy redirect links.

Like I could do affiliatedude.com slash whatever. Boom. Easy. Long term viability. Keep your search enging rankings and you could build and grow for passive income.

Now, the downside of this method method is it does cost an average of about seven dollars a month or twenty five cents a day.

So if you're like, well, Marcus, I go and I get a Happy Meal every month and I don't want to give up my Happy Meal because, you know, business is not that important to me. I'd rather have a Happy Meal or whatever it is. Then that would be the downside. That would be the con.

So what is this?

Well, it's [starting your first niche blog now](#). Over at [GoHubSite.com](#) I have instructions and you could start your first blog today for less than seven dollars a month.

You get your domain. You get all the other stuff as of the time of recording this video. They do offer the free domain name. They even give you like free traffic credits and all kinds of cool stuff. You can go to [gohubsite.com](#) There's instructions you could start your own.

Dun dun dun. We need a drum roll. All right. Rapid fire niche around. Here we go. Go to GoHubSite.com - Start your first site today.
